

HÍVEŠ FRANTIŠEK

Junior programmer

PROFILE

I like challenging tasks, as they open new ways to acquire knowledge unknown. I am eager to gain experience in programming and start a career in computer science. My perseverance, versatility and creativity have always helped me to solve difficult tasks. I consider constant personal improvement important.

At my last job, I gained a lot of experience in communication with people from different cultures speaking foreign languages and valuable lessons of teamwork essential to manage daily hardships.
